SUMMARY

Experienced Frontend Developer with 8+ years of building scalable web applications using React.js, Next.js, and Express.js. Proven ability to design and optimize microservices-based architectures, ensuring high performance, security, and scalability. Passionate about developing intuitive user interfaces, API integrations, and performance optimization for web applications. Strong experience with Redis for caching, cloud messaging APIs, and real-time systems.

SKILLS

- **Frontend:** React, Next.js, Ethers.js, Web3.js, React Native, Typescript, Javascript, CSS, HTML5, TailwindCSS.
- **Tooling:** Docker, Kubernetes, Redux, Webpack, Vite, Rspack, Babel, Monorepos
- **Backend:** Node.js, Express.js, NestJS, GraphQL, TypeORM, Prisma, Redis, Websockets.
- **Testing & Quality:** Jest, Cypress, Playwright
- **Data & Performance:** Elastic Search, Grafana, Vector Databases
- **Architecture:** RESTful APIs, Microservices, System Design, Performance Optimization
- **Accessibility:** WCAG Guidelines, Assistive Technologies, Accessible Rich Internet Applications (ARIA), SEO Optimization
- **Leadership:** Team lead, Startup founding team, Strategic Planning, Project Management, Cross-functional Collaboration, Mentorship

RELEVANT EXPERIENCE

Founding Engineer, Blockradar.co

May 2024 - Present

- Led the team to architect and develop a non-custodial stablecoin wallet infrastructure for fintech using Next.js, React, and TypeScript, achieving \$33M+ in on-chain transaction volume.
- Spearheaded frontend architecture for multi-chain wallet integrations, improving client onboarding speed by 40% through Next.js optimisation and intuitive UX.
- Architected a Redis-backed caching system to handle address generation, manage queue keys for subscriptions, and optimize data access, significantly improving API response times.
- Designed and implemented a crypto-powered subscription service, unlocking new revenue streams for Blockradar's customers.

Software Engineer III, Turing Enterprises Inc - USA

February 2022 - October 2024

- Led a pod of 5 engineers in Agile workflows (Jira) to build a React component library, boosting development efficiency by 35%.
- Built an AI-powered matching tool that slashed developer vetting time from 1 week → 2 days, increasing job match rates to 30% for a 100-person team.
- Designed and built a high-performance, scalable API-as-a-service used across all Turing products, featuring robust authentication and monitoring systems.
- Optimized the matching product API, reducing average response time from 15 seconds to 1.9 seconds, resulting in a 60% increase in team productivity.
- Developed scalable microservices and optimized web load balancing strategies, improving API performance and reducing downtime.
- Implemented comprehensive monitoring and logging systems using Google Cloud Platform, including Cloud Logging for application monitoring, BigQuery for large dataset analysis, and Kubernetes for application deployment and management.

Senior Frontend Engineer, Partsimony Inc - NY, USA

October 2021 - November 2023

- Led architecture of Next.js micro-frontend infrastructure for manufacturer websites, improving scalability and enabling a \$1M+ revenue pipeline from Partsimony 2.0, an AI/ML SaaS platform for supply chain optimization.
- Boosted SEO performance by 30% via Next.js optimizations (SSR, metadata) and championed WCAG compliance through audits and team training.
- Engineered high-performance features:
 - Real-time CAD file streaming and viewer, reducing client-side load times by 40%.
 - Fuzzy search and dataset virtualization for 10k+ records, enhancing UX for enterprise clients.
- Built Stripe-powered global payments and automated testing (Playwright/Jest), cutting deployment errors and increasing our shipping velocity.

- Scaled team processes: Introduced QA templates and Agile workflows, accelerating feature delivery and better feedback loop.

Frontend Engineer, Menaget SPC - Manama, Bahrain

December 2019 - February 2022

- Worked with a 6-person team in developing new features for the Mnassa (Saudi) social media platform, doubling app performance and achieving 6000 daily active users.
- Designed the application architecture for senderrand.com, a new startup, using React Native and XMPP.
- Created a React Native design system to ensure uniform development across multiple applications.

Frontend Engineer, Color Elephant - Porto, Portugal

February 2021 - May 2021

- Coordinated the development of the Zirkel app and fixed several existing bugs for multiple client web and mobile application projects impacting latency, startup speed, and the UX using React Native, React, Javascript, Typescript, and Airtable.

Frontend Engineer, Cygnusspin - Ibadan, Nigeria

July 2019 - February 2020

- Built the front end of a white-label sports betting platform solution that processes the odds for over 1000 real-time events in 1 second using NuxtJs, Vue, Socket.io, and Real-time events processing.

Frontend Engineer, Findthepro - Ibadan, Nigeria

December 2018 - July 2019

- Built an on-demand platform that connects 6K+ professionals to customers in need of professional services and collaborated with a 7-person team to create a real-time chat system with file sharing, voice notes, and video messaging capabilities using React, Bootstrap, and Socket.io

Web Developer, Foodlocker - Ibadan, Nigeria

December 2017 - November 2018

- Collaborated with a team to develop and maintain key features of a farm-to-consumer e-commerce platform, enabling smallholder farmers to sell directly to buyers and improving accessibility to affordable food items.

EDUCATION & CERTIFICATIONS

- National Diploma - Computer Science, The Polytechnic Ibadan - Ibadan, Nigeria
- Mobile Web Specialist (with focus on Accessibility), Udacity - Google Scholarship Program

SELECT PROJECTS

Blockradar

- I Built the entire frontend system for a web3 non-custodial stablecoin blockchain wallet infrastructure.
- Technologies: Web3, Nextjs, React, Typescript, TailwindCSS.

Blocasset Profile

- I led the Frontend team for blocasset.com to develop a social application connecting builders, contributors, founders, and talents on-chain.
- Technologies: Web3, Nextjs, React, Typescript, WalletConnect, Privy, Farcaster protocol.

Pave Motors

- Created a marketing page and eCommerce platform that allows customers to easily order bikes from any part of the world using React, NextJS, TaiwindCSS, Sendgrid, and Stripe.
- Developed an innovative blockchain feature that provides bike owners with a crypto token and BLE technology that allows users to unlock bikes from their phones using Flutter.
- Drove the resolution of long-term UI bugs, enhanced the user experience for a bike remote unlocking feature, and implemented a feature to display current user location and weather.
- Researched industry-specific keywords, introduced Facebook pixels for tracking, implemented server-side rendering, championed SEO best practices, and provided recommendations to optimize the user experience.

COMMUNITY ENGAGEMENT

- Organizing Volunteer, ETH Dubai 2022
- Lead Organizer, Google Developer Group Ibadan 2019 - 2022
- Speaker and Advocate for Web Accessibility - Created and presented public slide decks on implementing accessible web design
