PROFESSIONAL SUMMARY

Product-minded full-stack engineer with 7+ years of experience delivering high-impact, scalable applications across fintech, SaaS, and AI platforms. I build reliable software with React and Next.js on the frontend and Node.js / Nest.js on the backend, lead cross-functional teams, and consistently drive measurable business outcomes.

PROFESSIONAL EXPERIENCE

Fuze.us

Dubai, United Arab Emirates

Senior Software Engineer

October 2024 - Present

- Delivered MVP for ProShop golf app 1 month ahead of schedule, as a full-stack engineer working with Node.js, express.js, Postgresql, AWS, React, Next.js, and TypeScript.
- Managed full deployment pipeline with AWS, Github Actions, Kubernetes, AgroCD and Docker.
- Spearheaded sprint planning and stakeholder alignment, ensuring delivery consistency across cross-functional teams.
- Championed code quality via peer reviews, technical documentation, and scalable UI patterns using Styled Components.

Turing

Remote

Software Engineer III

February 2022 - October 2024

- Led a pod of 5 engineers to develop a reusable React component library, boosting development speed by 35%.
- Built an AI-powered vetting tool, reducing screening time by 71% and improving match accuracy by 30%.
- Optimized critical API flows, cutting response times from 15s to 1.9s, and integrated CI/CD pipelines with TypeScript.
- Strengthened testing and deployment reliability via Jest, Cypress, and Kubernetes-based infrastructure on GCP.
- Designed and built a high-performance, scalable API-as-a-service across all Turing products, featuring robust authentication and monitoring systems to power all developer information across all microservices.

Partsimony

Remote

Senior Software Engineer

October 2021 - November 2023

- Architected and delivered micro-frontend infrastructure with Next.js and GraphQL, enabling \$1M+ revenue pipelines through the launch of Partsimony V2.
- Build scalable GraphQL API in Elixir to power CAD component recommendation engine.
- Increased SEO performance by 30% and implemented WCAG-compliant design across manufacturer platforms.
- Converted mockups and complex prototypes into pixel-perfect web applications across multiple manufacturers' platforms.

Menaget SPC

Remote

Frontend Engineer

December 2019 - February 2022

- Doubled app performance and reached 6,000 daily active users by engineering frontend features with React, Next.js, TypeScript, JavaScript, and HTML in an Agile team using Git.
- Established a React Native design system and implemented scalable, testable UI components.
- Improved deployment reliability and code quality by integrating Jest and Cypress for automated tests, and contributing to CI/CD pipelines with Git.

Cygnusspin

Ibadan, OY, Nigeria

Frontend Engineer

July 2019 - February 2020

- Developed real-time features and responsive UIs across consumer-facing apps using React, Vue, and Socket.io.
- Reduced data latency under 1s using efficient state management and live updates via Socket.io.

Findthepro

Ibadan, OY, Nigeria

Frontend Engineer

December 2018 - July 2019

- Built scalable UI features for a pro-client marketplace using React, JavaScript, and HTML/CSS.
- Developed a real-time messaging system (chat, voice, video) with Socket.io, boosting user engagement by 30%.

SKILLS

Frontend: React.js, Next.js, React Native, HTML/CSS, TypeScript, JavaScript, TailwindCSS, Ether, Web3.js, Redux.js, React Query

Backend: Node.js, Nest.js, REST APIs, GraphQL, Postgres, MySQL, Redis, TypeORM, Prisma, MongoDB

Tooling: AWS, Google Cloud Platform, Docker, Kubernetes, Microservices, Grafana, Elasticsearch

EDUCATION

The Polytechnic Ibadan
Associate's, Computer Science

June 2016 - November 2018
