PROFESSIONAL SUMMARY

With six years of experience as a Software Engineer, specializing in full-stack development with a focus on frontend, I have a proven track record of delivering scalable web and mobile applications. In my current role at Turing, I have spearheaded new product initiatives, from conceptualizing engineering specifications to executing pixel-perfect frontend and robust backend APIs. My role encompasses leading the design of system architecture, end-to-end product development, rollout strategies, customer integration, and maintenance, all while collaborating with stakeholders and product leaders to surpass business objectives and key results.

TECH STACK

Front End	React, Next.js, React Native, Typescript, Javascript, CSS, HTML5, TailwindCSS
Back End	Node.js, Nest.js
Data store/ORM	MySQL, PostgreSQL, BigQuery, Redis, TypeORM, Prisma, Drizzle.
Toolings	GCP, Jenkins, Docker, Jest, Cypress, Playwright, Elastic Search, Grafana.

EXPERIENCE

Software Engineer III (Core Team) | Turing Enterprises Inc | USA

February 2022 – Present

<https://www.turing.com/>

Technologies: React, Typescript, NodeJs, NestJS, gRPC, MySQL, TypeOrm, Storybook.

- At Turing, I led the design of system architecture and end-to-end product development, overseeing rollout strategies, customer integration, and ongoing maintenance.
- Worked on a component library that powered the suites of products used in the company.
- Built an intelligent matching tool that helped the team vet thousands of devs much faster and efficiently, this led to a 30% increase in the company match rate in the first month of launch.
- Designed and built a new microservice that powered the developer-related information at Turing - worked at a full-stack capacity including system architecture, monitoring and logging, this service has ensured 100% accuracy in developer information across the company products.
- Wrote multiple test cases to ensure full coverage of the codebase unit and e2e test with Jest and Cypress.

- Collaborated with stakeholders, leadership, and cross-functional teams to achieve the company's KPI month-on-month.

Senior Frontend Engineer | Partsimony Inc | NY, USA

October 2021 – November 2023

<https://www.partsimony.com/>

Technologies: React, Typescript, Nextjs, TailwindCSS, tRPC, GraphQL, PostgreSQL, Drizzle.

- Built and launched Partsimony 2.0 which led to a \$1m increase in the revenue pipeline for the company.
- Built a robust payment system that allows users to receive and pay from anywhere in the world with a card or bank account.
- Built a robust Excel parsing tool
- Built a communication tool with real-time messaging functionality, file sharing, multi-views, and mentions.
- Worked on a CAD viewer that lets users view their engineering design on the web.
- Designed new user flow/experience for new product initiatives.
- Created new team cultures and processes like developing a new QA template to ensure the team ships quality products.

React Native Engineer | Menaget SPC | Manama, Bahrain

December 2019 – February 2022

<https://www.menaget.com>

Technologies: React, React Native, JavaScript, TypeScript, XMPP, NPM, SQLite, Docker, VueJS.

- Led a team of engineers on one of the external products and worked majorly to drive adoption and increase user retention, after a few months, we were able to make the app x2 faster than before and also have 6000 daily active users on the platform.
- Got invited by the CEO to become a founding engineer on his new startup idea in Dubai <https://senderrand.com> where I worked on the entire application architecture for the mobile engineering team and also built an MVP for the idea.
- Built a react native design system to facilitate a uniform development process for all our applications.

React Native Engineer | Color Elephant | Porto, Portugal

February 2021 – May 2021

<https://colorelephant.com/>

Technologies: React Native, React, Javascript, Typescript, Airtable.

- Worked on multiple client projects both for web and mobile applications
- In my first month of joining, I was able to help complete three major projects and fix several existing bugs which helped the company retain a nice relationship with the client.

Frontend Engineer | Cygnusspin | Ibadan, Nigeria

July 2019 – February 2020

<https://cygnusspin.com/projects/sportsbet/>

Technologies: NuxtJs, Vue, Socket.io, Real-time events processing.

- Built the first white-label sports betting platform solution that processes over 1000 real-time events odds in a second.

Technologies: React, Bootstrap, Socket.io.

- Built an on-demand platform that connects professionals to customers who need certain services.
- Built a real-time chat system with file sharing, voice notes and video messaging capability.

PROJECTS

Pave Website - <https://pavemotors.com/>

Skills: React, NextJS, TaiwindCSS, Sendgrid, Stripe.

- I was hired as an independent contractor to build the current marketing page and also an e-commerce platform where customers could order bikes from any part of the world. I also implemented best practices for SEO and advised on the best user experience.

Penalogue App - <https://penalogue.com/>

Skills: React Native, Expo, Reanimated.

- Built a mobile application for taking down written and audio poems, built for creators in all workspaces of life, is currently in beta testing.

Logistiks App - <https://logistiks.com.ng/>

Skills: React Native, Expo, Reanimated, Payments Integration.

- Built a mobile application that allows users to choose between various delivery companies to help carry out their tasks, based on ratings, prices and proximity.

EDUCATION

NATIONAL DIPLOMA | The Polytechnic Ibadan | Ibadan, Nigeria

2016 – 2018 - Computer Science.

Mobile Web Specialist | Udacity

2018

ADDITIONAL ACTIVITIES

Organizing Volunteer at ETH Dubai | Dubai, UAE

2022

Mentor for Frontend Track | Ingenii Fellowship | Nigeria

2022 - Present

Lead Organizer Google Developer Group Ibadan

2019 - 2022
